PROFESSIONAL SUMMARY

Motivated and detail-oriented IT student and aspiring Full-Stack Developer with a strong foundation in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Java. Experienced in designing and developing end-to-end web applications that solve real-world problems, with hands-on exposure to REST API development, database design, and responsive UI creation. Adept at backend logic, MySQL integration, and agile collaboration. Demonstrates a strong problem-solving mindset, quick learning ability, and genuine passion for building scalable, efficient software solutions.

EDUCATION

B.Sc. IT – Bachelor of Science in Information Technology Expected: April 2026
B.N.N. College, Bhiwandi | Current CGPA: ~9.0

HSC (12th Standard)
B.N.N. College, Bhiwandi | Score: 55%

SSC (10th Standard)
B.V.N. Hindi High School | Score: 86.20%

EXPERIENCE

Eureka Outsourcing Solutions Pvt. Ltd. Mar 2025 – Jun 2025
Apprentice – Customer Care Associate

- Completed structured professional training in call center operations, CRM systems, and customer handling protocols.
- Resolved customer queries efficiently and accurately, consistently maintaining high customer satisfaction metrics.
- Strengthened communication skills, real-time problem-solving abilities, and adaptability in a fast-paced work environment.
- Demonstrated discipline, consistency, and ability to work effectively under pressure and tight timelines.

PROJECTS

MediAlert – Medical Stock Management System
Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN)

- Developed a full-stack web application to track medicine inventory, stock levels, and expiry dates in real time.
- Implemented an automated alert system that notifies administrators of upcoming medicine expiries, significantly reducing medical waste.
- Designed and integrated a module supporting NGO-based redistribution of unused, near-expiry medicines to optimize supply utilization.
- Built RESTful APIs for CRUD operations on medicine records, enabling seamless frontend-backend data communication.

File Organizer System – Automation Tool
Tech Stack: JavaScript / Node.js

- Developed an automation tool that intelligently scans directories and organizes files into categorized folders based on file type and extension.
- Implemented dynamic logic to handle multiple file formats (images, documents, videos, code files) without manual intervention.
- Improved file management efficiency by eliminating repetitive manual sorting tasks, saving significant time for end users.
- Designed a modular and extensible architecture, allowing easy addition of new file categories and rules in the future.

TECHNICAL SKILLS

Languages: JavaScript, Java, HTML, CSS
Frameworks/Libraries: React.js, Node.js, Express.js
Databases: MongoDB, MySQL
Tools: Git, GitHub, VS Code
Concepts: REST APIs, CRUD Operations, Responsive Design, Backend Logic

ADDITIONAL INFORMATION

- Strong analytical and problem-solving mindset with the ability to break down complex challenges into structured solutions.
- Quick learner and highly adaptable — able to pick up new technologies and frameworks with minimal ramp-up time.
- Effective team player with good interpersonal and communication skills, experienced in collaborative environments.
- Genuinely passionate about software development and committed to continuous growth through hands-on learning.
